Established in 2003, Changing Tides has become one of the leading manufacturers and distributors of plastic housewares & brushware in South Africa and abroad.

### **Changing Tides**

Tides are the rise and fall of sea levels caused by the combined effects of the gravitational forces exerted by the Moon and the Sun, and the rotation of Earth.. Tide tables can be used to find the predicted times and amplitude (or "tidal range") of tides at any given locale. The predictions are influenced by many factors including the alignment of the Sun and Moon, the phase and amplitude of ...

The first paragraph in our discussion of tides (found in the section: Coastal Processes) introduces us very briefly to tide pools and biological zonation and shows this picture of curious adults and children at low tide marveling at the animals and seaweeds clinging to the steep faces of massive rocks. What is immediately obvious to these explorers, and almost anyone observing our rocky coast ...

The word "tides" describes the regular rising and falling of the ocean's surface. Large lakes, such as the Great Lakes, also have tides, but the change in water level is only inches. Ocean tides are measured in feet. Tides are caused by gravitational forces of the moon and the sun. The sun is huge ...

A Supermoon looks larger than a Micromoon. A Super Full Moon looks larger than a Micromoon. When a Full Moon takes place when the Moon is near its closest approach to Earth, it is called a Super Full Moon. When there is a New Moon around the closest point to Earth, it is known as a Super New Moon.. A Micromoon, on the other hand, is when a Full or a New Moon is near its farthest point from ...
