Learn and research science, chemistry, biology, physics, math, astronomy, electronics, and much more.
101science.com is your scientific resource and internet science PORTAL to more than 20,000 science sites.

Chemistry - 101science.com

In cell biology, a vesicle is a large structure within a cell, or extracellular, consisting of liquid enclosed by a lipid bilayer. Vesicles form naturally during the processes of secretion (), uptake (endocytosis) and transport of materials within the plasma membrane. Alternatively, they may be prepared artificially, in which case they are called liposomes (not to be confused with lysosomes).
