Anesthesia or anaesthesia (from Greek "without sensation") is a state of controlled, temporary loss of sensation or awareness that is induced for medical purposes. It may include analgesia (relief from or prevention of pain), paralysis (muscle relaxation), amnesia (loss of memory), or unconsciousness. A patient under the effects of anesthetic drugs is referred to as being anesthetized.

Suspended animation is the inducement of a temporary cessation or decay of main body functions, including the brain, to a hypometabolic state in order to try to preserve its mental and physiological capabilities.. As a theoretical concept, it has been included in a wide range of fiction books and films but has not been implemented as a medical procedure for either short or extended time.

### **Suspended animation - Wikipedia**

Solutions is a flexible PMI product for businesses, which can cover up to 249 employees. It gets members access to private medical treatment at a nationwide network of hospitals and clinics, and its added value benefits can also help employers address health and risk factors in the workplace.
