

office automation the productivity pdf

Office automation which involves the use of information technology applications and tools to perform daily tasks at organizations has made it clear that it influences worker's productivity. But to what degree the use of office automation improves the productivity of people in office operations depends on how and why it is used instead of focusing on the technology.

The Impact of Office Automation on Worker's Productivity

Computer technology has recently been applied to the automation of office tasks and procedures. Much of the technology is aimed not at improving the efficiency of current office procedures, but at altering the nature of office work altogether. The development of automated office systems raises a number of issues for the organization.

The impact of office automation on the organization
