A transformer is a static electrical device that transfers electrical energy between two or more circuits through electromagnetic induction. A varying current in one coil of the transformer produces a varying magnetic field, which in turn induces a varying electromotive force (emf) or "voltage" in a second coil. Power can be transferred between the two coils, without a metallic connection ...

A healthful eating pattern, regular physical activity, and often pharmacotherapy are key components of diabetes management. For many individuals with diabetes, the most challenging part of the treatment plan is determining what to eat.

Nutrition Therapy Recommendations for the - Diabetes Care

Motivation is the reason for people's actions, desires and needs. Motivation is also one's direction to behavior, or what causes a person to want to repeat a behavior. An individual's motivation may be inspired by others or events (extrinsic motivation) or it may come from within the individual (intrinsic motivation). Motivation has been considered as one of the most important reasons that ...

Hemophilia is the most common congenital bleeding disorder. Hemophilia A is a sex-linked disorder due to a deficiency of clotting factor VIII. Other bleeding disorders include hemophilia B or Christmas disease (factor X deficiency). The normal concentrations of clotting factor are between 50% and 150% of average value and the minimum level of a factor for adequate hemostasis is 25%.
