Brain Injury Guidelines - Ontario Neurotrauma Foundation (ONF)

The brain is an organ that serves as the center of the nervous system in all vertebrate and most invertebrate animals. The brain is located in the head, usually close to the sensory organs for senses such as vision. The brain is the most complex organ in a vertebrate's body. In a human, the cerebral cortex contains approximately 10â€™20 billion neurons, and the estimated number of neurons in ...

Here you can find out all about brain and spinal cord tumors in adults, including risk factors, symptoms, and how they are found and treated. (For information on children's tumors ...

Brain and Spinal Cord Tumors in Adults

Why do we think we're so bad at maths, when we're all - almost all - born with brain circuits specialised for numbers? Our ability to use numbers has been the key from taking us from the Stone Age to the Phone Age. Trade, science and technology would be impossible without this ability. Neuroscientist Brian Butterworth argues that we are all born with brain circuits specialised for numbers.
